

Name: _____

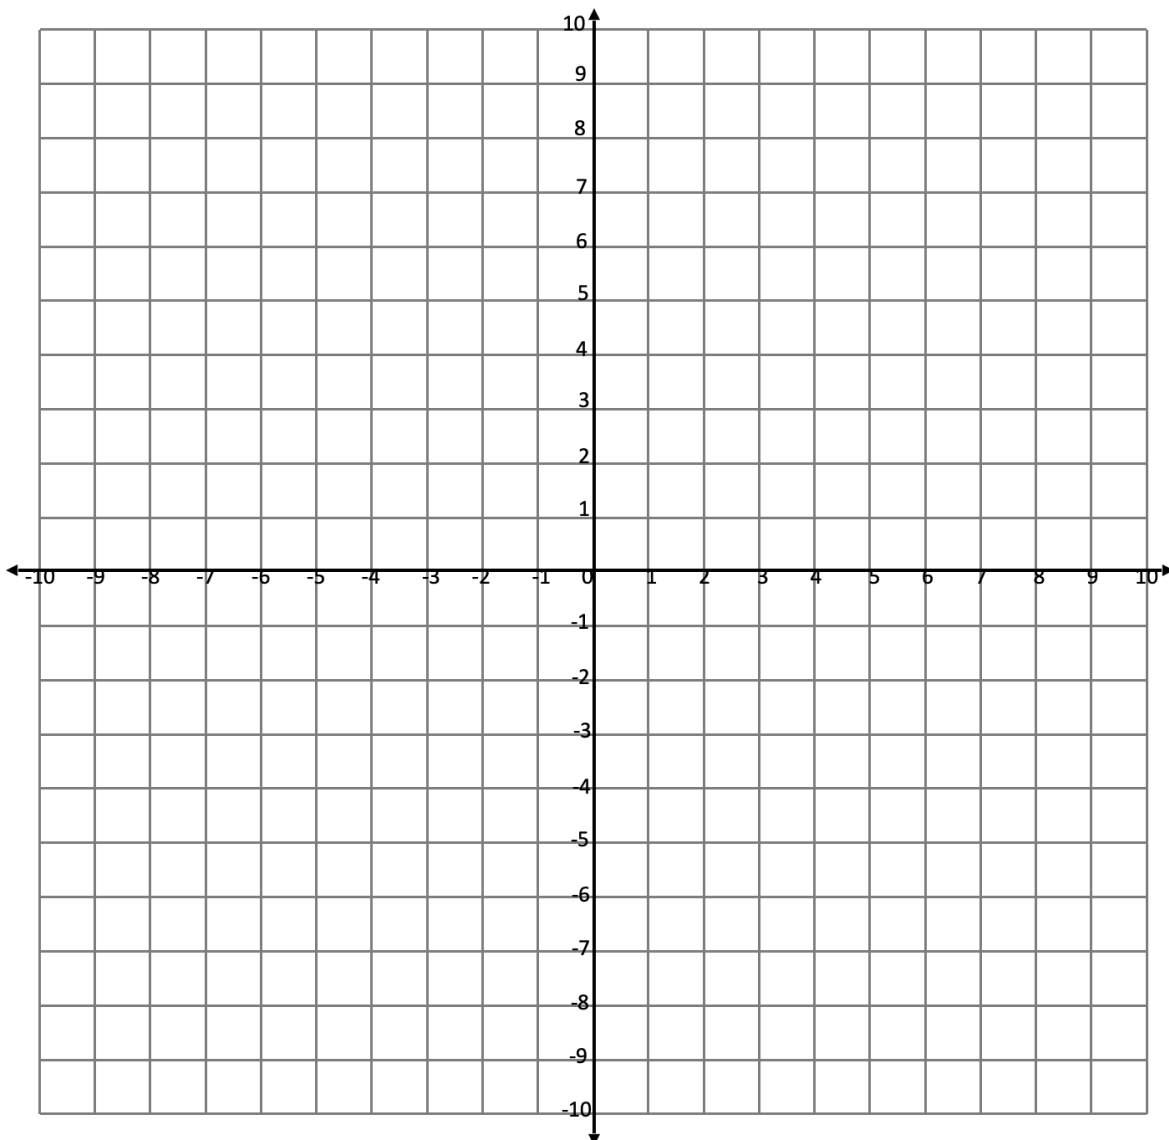

Date: _____

WELCOME

To Coordinate Bingo

Student Instructions:

Plot 20 points on the coordinate plane and write the coordinates of each point next to it. Listen carefully to the adult who will call out coordinate points. If you hear one of your points, circle it. The first person to circle 5 points wins!

WELCOME

To Coordinate Bingo

Teacher/Parent Instructions:

Once the students have plotted and labeled coordinates for 20 random points on their coordinate plane, open a random number generator on your phone, set to generate numbers between -10 and 10. Use the generator to randomly select two numbers, then call out the corresponding coordinate pair. Continue this process until a student has circled 5 points and wins the game.
