

Fractions with Zeros

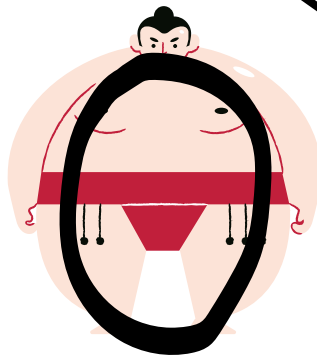

When there is a zero on the top, imagine it's a sumo wrestler. The sumo wrestler is so heavy it's going to squish any number that is underneath. The answer is always zero.

Fractions with Zeros

$$\frac{2}{\quad}$$

$$\frac{2}{0}$$

= und.

When there is a zero on the bottom or a sumo wrestler on the bottom, it becomes a mess. The answer is always undefined.
