# Triangle
CROSSWORD PUZZLE

ACROSS

3. the name of the longest side of a right triangle

5. a special triangle with two sides equal, and two angles opposite those sides are equal

7. special triangle called ___ -60-90 triangle

8. a name of a theorem used to find an unknown side of a right triangle

DOWN

1. a right angle has this many degrees

2. two triangles who have corresponding angles that are equal and corresponding sides that are proportional are called what?

4. the sum of angles of any triangle add up to this number

6. special triangle called the ___- ___–90 triangle
